

Aurelia Grand Hotel Group

Historical Case Resolution Guide

Past resolution patterns for cleanliness, maintenance, service, and exception cases

Document ID	AGHG-HCR-006
Owner	Quality and Guest Experience
Version	3.0
Effective Date	04 Jul 2026
Review Cycle	Semiannual or after major operational incident
Classification	Confidential - Internal Hotel Operations
Applies To	Property managers, duty managers, and guest experience supervisors
Approved By	Group Quality Director

Purpose and usage

This controlled document defines operational standards for hotel teams. It is intended to support consistent decisions, clear accountability, accurate record keeping, and high-quality service recovery across Aurelia properties. Teams must apply local legal requirements when those requirements are stricter than this standard.

Lessons Learned and Manager Discussion Prompts

1. Purpose and Use of Historical Cases

This guide summarizes past resolution patterns to help managers apply consistent judgment. The examples are not automatic rules. Each current case must be evaluated based on evidence, guest impact, approval authority, and operational context.

- Use similar cases to understand proportional remedies.
- Do not copy a previous remedy without checking current policy and authority limits.
- Escalate when a current case has legal, safety, privacy, accessibility, or reputational risk.
- Record why the selected remedy matches or differs from similar cases.

Consistency factors

Factor	Why it matters
Verified responsibility	Higher confidence supports stronger remedy.
Impact duration	Overnight or multi-hour disruption usually carries more weight than brief inconvenience.
Guest relationship	Repeated positive history may support tailored recovery.
Preventability	Known or repeated defects increase responsibility.
Operational follow-up	Compensation should be paired with corrective action.

2. Cleanliness and Housekeeping Cases

Case	Issue	Context	Resolution
HC-001	Dirty bathroom on arrival; photo showed hair in shower; supervisor confirmed.	Gold leisure guest, one-night stay.	30% refund of affected night, immediate reclean, housekeeping coaching.
HC-002	AC not cooling overnight; prior ticket open before arrival.	Platinum guest, three-night stay.	One affected night refund, future upgrade note, room blocked for engineering review.
HC-003	Noise from rooftop event	Member, business traveler.	Partial affected night

	until midnight; guest called twice.		adjustment and food/beverage credit.
HC-004	Guest claimed missing towels; housekeeping delivered within 12 minutes.	First-time guest.	Apology only, no financial remedy.
HC-005	Room type mismatch due to oversell; king reserved, twin assigned.	Corporate traveler.	Difference in room value, points, and account owner notification.
HC-006	Plumbing leak discovered after check-in; guest moved rooms.	Family booking.	One affected night refund and housekeeping recovery task.
HC-007	Guest requested full refund for slow check-in; delay was 18 minutes.	No prior stay history.	Apology and drink voucher; no refund.
HC-008	Bathroom odor complaint; maintenance found dry trap and resolved same day.	Silver guest.	Points posting and engineering preventive note.

Cleanliness cases depend heavily on timing and evidence. If a guest reports the issue immediately after arrival and photos or supervisor inspection support the concern, the case should normally be treated as hotel responsibility. If the guest declined service or reported the issue after checkout without supporting information, a modest goodwill response may be more appropriate.

3. Maintenance and Room Function Cases

Case	Issue	Context	Resolution
HC-009	Stained linen reported after bedtime; photo supported issue.	Platinum guest.	One-night adjustment and executive housekeeper call.
HC-010	TV remote not working; replaced within 20 minutes.	Member.	Apology only; issue closed as minor inconvenience.
HC-011	No hot water in morning; central issue affected eight rooms.	Multiple guests.	Affected-night partial refund and engineering incident summary.
HC-012	Guest reported pest sighting; inspection inconclusive but room moved.	Gold guest.	Manager review, room block, vendor inspection, goodwill voucher.
HC-013	Repeated AC complaints from same room over 30 days.	Several bookings.	Room blocked until root cause repair, compensation trend review.
HC-014	VIP suite not ready at arrival time; wait 75 minutes.	Ambassador guest.	Dining credit, manager apology, late checkout, profile note.

HC-015	Guest alleged room not cleaned; logs showed DND all day and refusal of service.	Long-stay guest.	Explanation and offer scheduled clean; no refund.
HC-016	Broken balcony lock found by staff before arrival but room assigned.	Family booking.	Room move, manager escalation, safety review.

Maintenance cases become more serious when the property had prior notice or when the room should have been blocked. Temperature control, hot water, plumbing, locks, electrical safety, and severe noise can materially affect room usability.

4. Service, Communication, and Arrival Cases

Case	Issue	Context	Resolution
HC-017	Email complaint after checkout with photos matching room damage.	Repeated guest.	Partial refund, maintenance ticket, furniture repair.
HC-018	Third-party review about rude staff, no booking match found.	Unknown.	Public response inviting direct contact; no case remedy.
HC-019	Mini-bar charge disputed; inventory record unclear.	Gold guest.	Charge removed as goodwill and process review.
HC-020	Accessible room feature unavailable despite confirmed request.	Guest with accessibility need.	Manager escalation, room move, refund review, formal follow-up.
HC-021	Construction noise disclosed at booking but exceeded scheduled hours.	Group booking.	Partial adjustment and operations review.
HC-022	Guest complained of smoke odor; supervisor confirmed.	Silver guest.	Room move, ozone/deep clean, amenity, no full refund.
HC-023	Late housekeeping refresh after three reminders.	Platinum guest.	Points, manager apology, housekeeping review.

Service-delay cases require a realistic view of duration, staff response, and promise made to the guest. A short wait with clear communication may require only an apology. A long wait affecting plans or VIP arrival standards may require tangible recovery.

5. Complex, Sensitive, and Exception Cases

Case	Issue	Context	Resolution
HC-024	Safe malfunction locked guest items for two hours.	Business traveler.	Dining credit, engineering review, apology note.
HC-025	Wi-Fi outage property-wide for six hours.	Corporate guest.	Partial adjustment based on business impact and account note.
HC-026	Guest used threatening	Repeated claims history.	Manager review, evidence

	language and demanded cash refund before describing issue.		request, no immediate high-value remedy.
HC-027	Room not serviced because staff incorrectly marked checkout.	Long-stay guest.	Reclean, points, supervisor coaching.
HC-028	Broken crib request not fulfilled until late evening.	Family with infant.	Amenity, points, service recovery note.
HC-029	Water leak from ceiling in corridor near room.	Guest felt unsafe.	Room move, manager apology, maintenance incident report.
HC-030	Guest complained about room view; view was not guaranteed.	Direct booking.	Explanation and future preference note; no compensation.

Sensitive cases should not be resolved solely through standard compensation tables. Safety, accessibility, privacy, and threatening behavior require careful manager handling, factual records, and where appropriate, legal or security involvement.

6. Resolution Pattern Summary

Pattern	Typical decision	Caution
Verified serious cleanliness failure	Partial to one-night adjustment depending on severity.	Do not close without housekeeping quality action.
Known unresolved maintenance defect	One affected night adjustment or stronger for repeat issues.	Room may need to be blocked; not only compensated.
Minor issue corrected quickly	Apology, small amenity, or points.	Avoid setting expectation of refund for every inconvenience.
VIP material disruption	Manager involvement and tailored remedy.	Stay within authority and document evidence.
Unsupported high-value demand	Respectful explanation or modest goodwill if relationship warrants.	Review prior claim pattern before rejecting.

The best case files show a clear link between evidence, impact, policy, remedy, and corrective action. When any link is missing, the decision should state the uncertainty rather than pretending the facts are stronger than they are.

7. Additional Reference Cases - Rooms and Engineering

Case	Issue	Context	Resolution
HC-041	AC intermittently failed after midnight; no technician available until morning.	Summer weekend, Gold guest.	One affected night refund, portable fan not considered sufficient, HVAC escalation.
HC-042	Toilet blocked twice during same stay; guest moved after second report.	Family booking.	Partial refund, plumbing inspection, room block until verified.
HC-043	Safe would not open before airport transfer.	Business traveler.	Transport support, manager apology,

			engineering review.
HC-044	Persistent smoke odor in non-smoking room; supervisor confirmed.	Platinum guest.	Room move, deep clean, points, housekeeping and security review.
HC-045	Wi-Fi slow during video meeting; property network showed outage.	Corporate guest.	Partial adjustment and account owner notification.
HC-046	Shower temperature fluctuated; maintenance could not reproduce.	Member.	Goodwill points and monitoring note; no refund.
HC-047	Broken desk chair affected work setup.	Long-stay guest.	Chair replacement, modest credit, furniture inspection.
HC-048	Room assigned with known cosmetic wall damage only.	Leisure guest.	Apology and future preference note; no financial remedy.

Rooms and engineering cases show that the same physical defect can produce different remedies depending on duration, prior notice, guest impact, and whether the room should have been blocked.

8. Additional Reference Cases - Service, Loyalty, and Exceptions

Case	Issue	Context	Resolution
HC-049	Loyalty benefits not recognized at check-in; guest had to ask twice.	Platinum guest.	Manager apology, points, front office coaching.
HC-050	Anniversary amenity missed; delivered after reminder.	Gold leisure guest.	Amenity replacement, handwritten note, no refund.
HC-051	Guest complained after checkout about noise but had not contacted hotel during stay.	Member.	Apology and room preference note; no compensation without supporting pattern.
HC-052	Public review mentioned dirty room; booking matched and photos supported claim.	First-time guest.	Private follow-up, partial refund, housekeeping review.
HC-053	Guest demanded refund for weather-related outdoor facility closure.	Resort stay.	Explanation and small goodwill activity credit; no room refund.
HC-054	Ambassador guest experienced repeated delayed responses over two stays.	Invite-only guest.	General manager review and tailored future-stay recovery.
HC-055	Guest claimed minibar charges were fraudulent; audit showed posting error.	Business traveler.	Charge reversal, apology, night audit coaching.

HC-056	Guest used abusive language toward staff during compensation discussion.	Repeated claims history.	Manager-only communication and security note; evidence review continued.
--------	--	--------------------------	--

Service and exception cases require tone control. A guest may be upset or difficult while still raising a valid issue. Staff conduct and guest conduct should be documented separately.

9. Lessons Learned and Manager Discussion Prompts

Prompt	Use in review meeting
Was the issue known before arrival?	Determines preventability and whether the room should have been blocked.
Did staff respond during the stay?	Shows whether the hotel had a chance to correct the issue.
Was the remedy proportional?	Compares guest impact with financial value.
Did compensation create operational learning?	Ensures root cause correction.
Would another manager make the same decision?	Tests consistency and case note clarity.

Managers should use the historical guide as a discussion tool. The best decision is one that is fair to the guest, controlled for the business, and clear enough to defend later.
